

# To help your dog enjoy a happy, healthy life

## THIS PREVENTATIVE CARE VISIT WILL INCLUDE THE FOLLOWING

---

### **Basic Chemistry Profile**

A blood chemistry profile, including SDMA, provides information about your dog's organ functions, as well as other functions of the body, such as blood sugar and hydration. A CBC can identify infection, inflammation, and anemia.

### **Complete Urinalysis**

This analysis assesses the overall health of your dog's urinary tract, including the kidneys and bladder. It identifies infection or inflammation in the urinary tract.

- Supports detection and intervention of potential underlying diseases
- Provides baseline values unique to your dog that can be tracked over time for subtle changes
- 1 in 7 adult pets and 1 in 5 senior pets have abnormal results\*

\*An Idexx study of 5,016 clinics
